ABOUT ME

My name is Sakunpat Padam, can call me Pui. I have a lot of intention to be an architect before I attended The University. Around secondary 2, when my dad went to study architecture, I saw my dad cut the model. Write in different ways, but in the end, my father did not finish school due to many problems. So I have something in mind about architecture and I think I have to learn architecture. When I became an architecture student, I began to learn and study various forms of work. And the most thing I am interested is concept of Architecture. I love achitecture and design, and for every project I'm trying to find the best solution or concept to go deep into detail, constructions and expand my knowledge.

I'm 23 years old. I graduated from King Mongkut's University of Technology North Bangkok with an Architecture degree in Faculty of Architecture and Design. If I work here, I will do my best. And listene to every instruction that the company teaches me I'm very diligent and eager.

I wish I would be a part of your company.
