About Me

I study Architecture because I love to be around the nature, it helps me fresh my mind and this gives me a better concept in my designs. In modern days buildings are designed similarly and polluted environment, my aim is to bring eco-friendly environment to the world for the health and safety of people and their comfort. During my time in university, I have learned alot about the design that can also be used as a function in the building and people experiences. With this studies, I am capable of working on a design that allows to be functional. I also enjoy using visuals software in my spare time as these helps me with my projects and studies.

Projects

3rd year

- **Come Dancing!** - This dance studio aims to get all people in Peckham to come and dance together to create community as this helps people to gain hope and motivation. Dancing could be in groups and solo. The greenery helps the environment as Peckham lacks greenery. The dance studio have all types of dancing classes to allow all ages and intense classes such as parkour dance movements and dance battles helps to avoid rivalry.
- **Fisherman Pavilion** – This project is about a pavilion that translate into a performance, my project focus on a fishing spaces with a multiple used in performance or festival. I learned to occupy a space on an abandon site to make it useful to public.

2nd year

- **GraffiNature** - The project focus on organic spray paint factory, the idea is turning the site into a healthy environment at the same time have graffiti as the site is polluted. In this project I learned to look into a design that can be useful to spaces from the activities.
- **Playful Nature Playground** – This playground project includes all types of childrens activity such as running, climbing and crawling in one small size intervention. I learn about safety and how the site can be made into a more colourful environment.

1st year

- **Dimsum Royal Garden** - This restaurant project focus on arts and cultural in a dumpling restaurant and this project allows me to experience a site that was uninhabitable, also I learned about the safety in kitchen and ways of keeping culture of designs.
- **Information Center Kiosk** - The information center is at Tate Modern, the things I have learned is making an information booth that can be used by both tourism and locals.
- **The Peace of Nature** – The small shelter project is designed in my own concept. I learned to work with a micro limited spaces and peoples feeling inside the shelter.

Education

Ravensbourne University London

- Part 1 ARB Architectural Assistant - Undergraduated Degree - Graduated (2018 - 2021)

University of Arts in London

- CCW Foundation Foundation Diploma (2017 - 2018)

Harow International School (Bangkok, Thailand)

- High School - Graduated (2017)

Software and Prototyping Skills

- Rhino 5/6
- AutoCad
- Illustrator
- Photoshop
- Revit
- Grasshopper
- VRay
- Lumion
- InDesign
- Microsoft Office
- Prototyping Machines
- Modelmaking
- Drawing

Experiences

Pizza Express - Live Competition Project

- **Interior Architecture project (2020)** - The project theme is frozen food of the future, in this project the designs are ice walls which allows people to dig the frozen ingredients for their pizza before cooking, it is a grab and go restaurant.
