# Redouan El Jeld

Architecte \_ Structural Engineer \_ BIM Expert \_ FengShui Expert

## PROFILE

Trained as an architect, I began my professional career in various Italian and French agencies for more than three years. In China, I worked as an architect, teacher of architectural structures at the School of Architecture of ZC.

I founded the research team on BIM in 5D in 2012, then the E.BIM Studio agency in 2017. With interdisciplinary collaborators, I led construction projects in the service of medicine, education, culture, hospitality, housing and industrial environments.

My experience and my technical know-how allow me to intervene on all the phases of studies of works of different types. Thanks to my mastery of software such as Revit and Navisworks, I can control the modeling and coordination of projects in a BIM environment.

Since I was a child, I studied oriental philosophy, for example the Taoist five skills (practice of Tao, medicine, astrology, divination and reading -face/hand/land reading). I use the top method of feng shui when I project villas and hospitals. Thanks to my grandfather.

## Areas of expertise:

- Public buildings, school, cultural and hospital facilities
- ERT, office buildings
- Industrial buildings, production architecture under GMP certification
- Collective and individual housing

## PROFESSIONAL EXPERIENCE

**2021.03** – / J&K BIM Studio - Pito Global Technology / France - China /

Co-founder, Associate Architect / BIM modeling and management service and graphic productions for international architectural agencies (France, Belgium, UK, Ireland, etc.)
