Application for a position of Junior Architect

Dear Architect 49 Limited

My name is Nattanan Kasemsarn, and I'm writing to apply for the position of full-time Junior Architect at Architect 49 Limited. I graduated from Chulalongkorn University, faculty of architecture, where I acquired my bachelor of architecture with GPA of 3.49, and have had an internship at East Architects.

My previous architecture experience of study and internship has refined my creativity, logic, design and team-work skill through practical design studios and experimental studies. During my time at University, I have also developed my design skill through additional credit subjects where I acquired my experimental and individual studies alongside my practical skill through design studios. I've also had my time of internship at East Architects company where I learned and developed my working skill through pre-liminary design with designing team.

I'm proficient in the use of AutoCAD, Sketchup, Photoshop and V-ray by using in most of my work. Moreover, I keen to explore additional software skill of Rhinoceros 3D, Autodesk Revit and Grasshopper at a moderate level or higher to develop my computer-aid architectural skill all the time. I always interest to develop my designing logic and detail skill.

I've attached my cover letter, resume, portfolio and transcript, which further details my skill, works and education. I am keen to discuss how I suite and be able to contribute to your good company. In addition, I am pleased to answer any questions you may have about me and my portfolio in an in-person interview.

Sincerely,

Nattanan Kasemsarn
