ABOUT ME

I'm a 23 years old Architectural Technologist, recently graduated from The University of Derby, England.

Born in Bangkok before moving to live in England at a young age. Beside that I have lived in America for a year during my internship.

I am a highly organised and confident individual, whose thorough and detailed approach to projects has excellent feedback from lecturers and the Principle of Akar Studios, where I undertook my internship. During my internship I experienced working in teams developing designs for different uses: from restaurants, retails, hotels, offices to private residentials.

LANGUAGE

ACCOMPLISHMENTS

- FINAL DEGREE SHOW LECTURERS AWARD - 2019
