- **3Ds MAX** Intermediate
- **Adobe Illustrator** Advanced
- **Adobe Photoshop** Advanced
- **Microsoft Office** Intermediate

ACADEMIC OBJECTIVE

I've always wanted to be an architect ever since I discovered my aptitude for math, physics, drawing, and the ability to efficiently arrange and rearrange things. I am determined to improve this skill. After graduating and gaining some work experience, I want to learn and practice skills that will help me fulfill my dream and prepare me for the path that I want to take as a quality architect.

WORK EXPERIENCE

● Part time Junior Interior Designer / ForX Design Studio Jul 2022 - Dec 2022

After the internship, ForX design studio contacted me to work with them several times, so I get a chance to work as an interior designer. I worked as a part time to collect experiences and projects for making portfolio to apply for university in Master degree.

- Being a part of interior design team, I learn to work with architects and developers. I worked in both architect design and interior design sometimes. It help me get an insight of interior designing. There are many projects which I put in this portfolio.

● Architect Internship / ForX Design Studio Apr 2021 - Jun 2021

I applied for For e(X)perimental Design Studio for internship because they work cooperatively between architect and interior designer. They agreed to give me an additional two weeks internship as an interior designer after six weeks as an architect internship.

- As an architect, They assigned me lots of project for the purpose of diversity of work. There were golf club, parking lots building, condominium(common area), office building, power plant, and private residential which each projects were during in different process.
- As an interior designer, I learnt 3Ds Max program for designing and rendering. They let me design the large living room and the salon. This internship confirmed that I prefer interior to architecture.
