# CHUTIKARN LERTCHAIPORN

## Curriculum Vitae

 Architecture (International Program)  
School of Architecture and Design(SoA+D)  
King Mongkut's University of Technology Thonburi(KMUTT)

Date of Birth : 19 January 1996  
Nationality: Thai

### Contact

 089-440-4006    chutikarn.lerc@gmail.com    Bow Lertchaiporn    @bowwiichn    59/65 Bangbon3 Rd.,  
Soi12., Laksong,  
Bangkae, Bangkok  
10160

### PERSONAL STATEMENT

Well-organized, considerable, good teamwork but easy going and kind. A fresh graduated student of Architecture program at SoA+D, KMUTT. Creativity, analytical skills, independence, self-awareness and have computer literacy skill. Fluent spoken and written English. Interested to work in every field of architecture and design. Highly interested in designing concert hall, convention center and

### EDUCATION

- 2014-2018  
School of Architecture and design  
KMUTT
- 2011-2013  
Kornpitack Suksa School
- 2002-2010  
Sarasas Witaed Bangbon School

### LANGUAGE SKILLS

 THAI  
Native

 ENGLISH  
Fluent

 KOREAN  
Beginner

### OTHER SKILLS

- Musical Instrument: Piano, Guitar, Ukulele, Dulcimer
- Taking Photography(and editing)
- Travel to new places around the world

Driving: Private car driving license

### DESIGN SKILLS

#### SOFTWARE SKILLS

**DRAWING**  
Autocad 

#### 3D & RENDERING

SketchUp   
Rhinoceros   
Grasshopper 

#### BIM

Revit 

#### GRAPHIC & PRESENTATION

Adobe Illustrator   
Adobe Photoshop 

#### PHYSICAL MODEL SKILLS

Laser Cutting Model   
Hand Cutting Model   
CNC and Vaccum Model 

### EXPERIENCES

Exhibition/Presentation/Competition/Workshop

  
Refugees Camp Project(2015)  
1 of 10 chosen project in class  
chosen by the external guest

  
Out of Sight Exhibition(2016)  
at Knowledge Exchange Center (KX Building)  
2 projects exhibited (refugees camp & Boutique)

  
Boutique Hostel Competition  
by Ocean New Line Company(2016)  
1 of 10 chosen project (refugees camp & Boutique Hostel)

  
Architecture 4.0 Exhibition(2017)  
at Knowledge Exchange Center (KX Building)  
1 project exhibited (SoA+D 2030)

  
Japan 13 Days Workshop  
with Kanagawa University  
to develop Gurnyoji Area

  
4 months internship period  
at RAD studio

### Project Description

This project is to design the pavilion inspired from the stuff that represent Thainess. So I choose 'Phan-Poom' to be the inspiration of this Thainess Pavilion.

### Concept

"Deconstructed Phan-Poom"

This is the unfolded of phan-poom's elements and reconstruct it in the new way. The form of this pavilion come from the unfolded of the whole shape of Phan-Poom (like the lotus shape) by cover the whole Phan-poom with the clay and unfold it. And the unfolded small elements become the wall components in the new way construction.

### Study Model

### The Author House

Students will work on the residential design for one user. He or she is an illustrator and author for children book. Spaces required for user will be place a creative working space similar to studio space. The children book private library and collection is also one of the main space requirement. Beside specific space requirements there are general requirement space for sleep, cook and have food. Students should derive the design from the children book that has been selected for the narrative design skill.

The combining of design process from narrative children book, the space requirement and user's character is the design challenge.

### Study Model

## Concept

This house come from the novel names 'Howl's Moving Castle' . I focus on chapter 3 that is the moment when Sophie see the castle and want to get into the house but she can't touch the door because of the protection of invisible wall that made by the majic of Howl that is a wizard.

Invisible wall makes Sophie to be unable to get into the castle. She can see the the door of the castle but she can't touch it because of the invisible wall and she can't see the invisible wall.

When we stay in front of the house, we won't be able to see the entrance or any void or window. But when we move a bit to the left or right side, we will be able to see the doors and windows. As the story of the novel that Sophie can't get into the house because of the magic.

This project is to design like a nursery of children in the refugee camp. So I decided to use natural material to build. And it is the temporary, so I have to concern about deconstruction and it has to be finished in a short period of time.

### Research

Refugee Children's need

- Happiness
- Warmth
- Good Health
- Good Society

### My Hypothesis

I think that if the site is in Thailand, it will be at the Western and the North-Western part of Thailand because we have some wars with Myanmar. So, the site would be there at Maehongsorn, Kanchanaburi, Tak or Ratchaburi.

### Inspiration

'BIRD NEST'

#### Form

The form of bird nest is curved shape that made warm feeling. So, we will feel warm when stay inside.

#### Meaning

Bird is the animal that very love their babies. Bird Nest made by the weaving of many tiny pieces of grasses and leaves. Parent have to try very hard to make the nest for their babies.

### Study Model

### Concept

According to the inspiration, I decided to use the form of bird nest and the way that the bird use to build their nest to design the shelter.

When children stay in this place, I want them to feel warm and feel like flapper that receive the love from their parents.  
 (Some children is orphan that lose their parents because of the wars or disasters)

### SECTION

**VOID**  
 TO LET THE LIGHT GO INSIDE  
 BUT CAN PROTECT THE RAIN

Hospitality design and the creation of a unique "Thai" experience are the main focus in this project. Bangkok, as the capital of Thailand, is one of the world's top tourist destinations with many travellers searching to enjoy the many various possibilities of experiencing the city and its country. Students are thus required to experience and learn about unique preferences of their self selected visitors.

The project site, a classic building phenomena of Bangkok, is contextualized by three existing shophouses that require for a conversion into a boutique hostel. The shophouses can be interconnected on all three floors. Further, students are allowed to extend the building, i.e. to provide access to the roof for facilitating hostel functions. The design is required also to comply with building code, law, and regulations such as fire escape stairs, openings for natural light and fresh air ventilation, as well as the keeping the front line of existing facade for consistency of existing the urban scape.

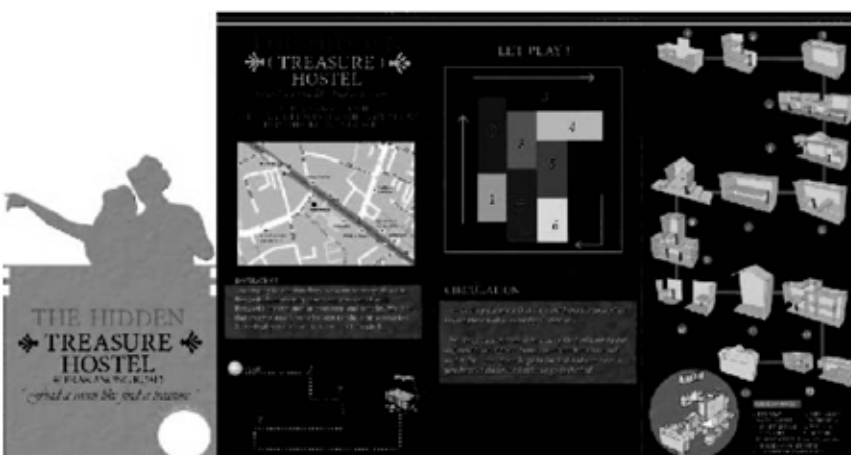

### Inspiration

According to our traveling, we found that each places that we go represent nthe history and story of Bangkok. So, the attractions is like the treasure that we have to keep for the next generation.

We went to many places in Bangkok. Almost every places are concerned with Bangkok's history such as museums and temples. We think that every places have to be kept for the next generation. So, each places are like the treasure of Bangkok.

We focus on the form and character of each attractions in Bangkok to design each units of this hostel. Then we design a function to be hiding the bedroom by the different level of the floor.

### Study Model

Preliminary Design

Concept

'The hidden(treasure) boutique hostel  
 Come to play the finding treasure game with us.  
 Find a bed like find a treasure  
 The room of hostel are like the treasure that we have to find.  
 attractions = treasure of Bangkok  
 bedroom = treasure os hostel

Facade Detail Model

**DESCRIPTION**

THIS PROJECT IS TO DESIGN THE MID-RISE CONDOMINIUM FOR THE BABY BOOMER AGE (PEOPLE ABOVE 60 YEARS OLD)

**INSPIRATION**

IN MY OPINION, I THINK THAT SOME OF BABY BOOMER'S LIFE IS BORING IN THE PAST OF THEIR LIFE BECAUSE THEY HAVE BEEN LIVED THEIR LIFE FOR A LONG TIME, SOMETIMES THEY MAY BE FACED TO MANY PROBLEM OR SOMETHING THAT MAKE THEM FEEL UNHAPPY. SO I WANT THEM TO FEEL HAPPIER AND MORE ENJOY WITH THEIR LIFE BY DESIGNING THIS CONDOMINIUM BY USING THE FORM OF MUSIC WAVE THAT IS INTERESTING AND LINK WITH THE MAIN PROGRAM THAT IS A CONCERT HALL AT THE CENTER COURT OF THIS CONDOMINIUM THAT MAKES PEOPLE FEEL RELAX AND IT WILL TREAT THEIR MOOD AS A MUSIC THERAPY.

**CONCEPT**

I DECIDED TO DESIGN THE FORM OF THIS BUILDING BASED ON THE FORM OF THE MUSIC WAVE AND PLAY WITH THE SIZE OF BALCONY OF EACH ROOM AND ALSO AT THE SHARED BALCONY AT THE CENTER OF THE BUILDING THAT LINK WITH THE MAIN PROGRAMMING THAT IS THE CONCERT HALL.

**DESIGN SOLUTION**

THE FORM OF THIS BUILDING BASED ON THE FORM OF THE MUSIC WAVE AND PLAY WITH THE SIZE OF BALCONY OF EACH ROOM AND ALSO AT THE SHARED BALCONY AT THE CENTER OF THE BUILDING.

**SOME OF FLOOR PLAN EXAMPLES**

## SOME OF FLOOR PLAN EXAMPLES

## PERSPECTIVES

This project is to design the 'Community Cultural and Contemporary Art Center'(CCCAC) the program contains many activity so we have to do a lot of user and program analysis before start designing this project.

### INSPIRATION

ACCORDING OUR RESEARCH AND SITE ANALYSIS SO WE START TODESIGN OUR PROJECT THAT LOCATION OF THIS AREA HAVE LONG HISTORY ABOUT COMMUNITIES, ONE OF THEM IS BAAN POON THAT HAVE A LONG HISTORY SINCE EARLY RATTANAKOSIN. WE INTERESTED IN THIER HISTORY, CULTURE AND THEIR KNOWLEDGE THAT CALL "BETEL NUT". SO WE CHOOSE THIS THING TO BE OUR DESIGN CONCEPT BECAUSE THE FORMS AND THE MEANING OF IT BY START TO DECONSTRUCT THE WAY OF FOLD BETEL NUT THAT BE OLD THAI TRADITIONAL AND REDESIGN IT TO MAKE COMMUNITY & CULTURE MUSEUM THAT WILL BE THE PLACE FOR GATHERING PEOPLE IN THIS AREA AGAIN SINCE THEIR WAS SEPARATE WHEN THE RAMA VIII WAS BUILT AND TO BE PLACE THAT LET PEOPLE INAND MAKE THIS AREA ACTIVE AGAIN.

DECONSTRUCT BETEL NUT BY CUT IN HORIZONTAL WAY TO SEE HOW IT FOLD TOGETHER

CUT THROUGH THE SECTION AGAIN TO SEE SPACE INSIDE AND HOW IT CAN GOING TO BE

SIMPLIFY IT TO BE MORE IN GEOMETRY FORM FOR EASY TO CRATE PROGRAMING INSIDE BUT STILL KEEP CHARACTER OF BETEL

## SITE ANALYSIS

THE RAMA VIII BRIDGE WAS BUILT TO SEPARATE THE COMMUNITY SO IT CAUSE EFFECT TO COMMUNITY MAKE THEM INACTIVE THAN BEFORE EVEN THEY BUILT PARK TO BE AREA FOR PEOPLE IN COMMUNITY TO USE BUT THE EFFICIENCY NOT GOOD ENOUGH THEN PEOPLE COME TO THIS SITE JUST FOR FREETIMES BECAUSE THERE ARE NO ACTIVITY OR THINGS TO ATTRACT PEOPLE TO COME TO THE SITE. SO WE DECIDE TO DESIGN FOR COMMUNITY AREA TO MAKE PEOPLE IN THIS COMMUNITY TO GATHERING AND HAVE ACTIVITY FOR PEOPLE TO DO TOGETHER AND MAKE MORE ACTIVE FOR THIS AREA BY PLACE ORIENTATION OF THE MUSEUM FOLLOW THE LOCATION OF COMMUNITY AND CREATE THE WALK WAY TO CONNECT EACH PART TOGETHER

TRY TO CONNECT EACH COMMUNITY TOGETHER BY USE THIS SITE TO BE LIKE COMMUNITY COMPLEX

the orientation of the building relate to community that be site surrounding this respond the design concept 'to connect each community together to make this area become lively again'

CREATE WAY THAT CONNECT EACH COMMUNITY AND ALSO CONNECT BOTH WAY TOGETHER

USE THIS SITE TO BE LIKE CENTER OF THE COMMUNITIES SO WE GOT THE ORIENTATION OF THE BUILDING.

Divide the orientation that provide to be both of building and the circulation that help people to come to this site and make it active again.

STUDY MODEL

## Concept

The form of this cocac come from the cutting of betel roll in the horizontal and vertical way. The elevation of this building come from the section when we cut the betel roll and the curved wall come from the form of the betel.

## Site Plan

## Model

### PROJECT DESCRIPTION

This project is to design the School of architecture. The site is in the KMUTT Bangkhuntien campus, (the place that I'm studying)

The concept of the school have to be from the "Biomimicry"(plants or animal) and we have to use the "Rhinceros" program with "Grasshopper" plug-in to create the form of the building by the idea of biomimicry.

We also have to create our own curriculum of this school by using the characteristics of our choosen biomimicry.

### CURRICULUM

#### "Community Base Learning"

Student have to learn by sharing with other, work together to have good teamwork and doing on their own duties by good time management and responsibility.

The relationship between bee hive and the community base curriculum is,

-Bee is the animal that have its own specifically duties and they work in the team by helping each other to make their work successful.

-The curriculum is "community base learning that students will learn and work in a team to make them having teamwork and well communicate with other when they are grow up and go to work.

### BIOMIMICRY

#### "BEE HIVE"

### CONCEPT

5 years = 5hives

Students will learn and work separated in the own hive(as each year studio) and finally communicate with other years by presenting at the jury hall at the center of the building.

Process of design

- Draw the hexagonal shape (Beehive's characteristic shape)
- Set 5 attractor point as 5 years studio
- Pull the hexagonal mesh to the points to make it be the organic shape like beehive's shape.
- Draw the upper platform to be use as supporting facilities and administrative zone and each hive are use as the studio and mini gallery.

FOURTH FLOOR PLAN

CURVY TRIANGULAR WAVE  
 CONCEPT

"curvy triangular wave"

We design this parametric surface by the combining of many triangular shape together. But we apply it to be more curvy by mapping the circle on each corner and each side then trim it.

The first we have the inspiration from triangle shape then we develop through grasshopper. The condition of triangle change through the waving sequence surface. It create new parametric surface and the space in between.

MODULE SCRIPT

MATERIAL

PARAMETRIC SCRIPT

PROCESS

## CONCEPT

This site is located beside 'We love the kind road' so I use the 'Golden Shower'(Ratchapruék) tree that is the tree of Thailand to be the inspiration for this hotel design.

## DESIGN PROCESS

I try to draft the outline of the shape of the selected Golden Shower Tree to be the guideline of the podium part's plan and draft the outline shape of the flower branch to be the shape of the tower (elevation side).

### ZONING BUBBLE DIAGRAM

INSPIRATION

CONCEPT

"Flowing of blood in the heart"  
Showing how the blood transfer in the heart from one room to another room that keep traveling all the time.

PROCESS

Tracing the form that come from many angle of the spinning bamboo model. Then trace the form of the left over space to be the plan of each part in the architecture.

DEVELOPMENT

SITE

RESIDENTIAL ZONE

INDUSTRIAL ZONE

COMMERCIAL ZONE

**INSPIRATION**  
DIFFERENCE OF CURRENT SITUATION OF AN URBAN DISTRICT AND DEVELOPE WITH THE MUSICIAN

**THESIS STATEMENT**

An individual singer and musician community to give more opportunity and quality of life to the individual singer and musician, also helping develop creative district.

**THESIS QUESTION**

- What kind of space will be suitable for variety kinds of program?
- How the place can satisfied the needs of people by using architectural design?
- How the place can create a new community?

**CONCEPT**

**PROGRAM**  
PROJECT AREA : 3,224 sq.m

**ZONING DIAGRAM**

The concept is interlocking and sharing space between public and private program by providing sharing space between it. People at sharing space can also see the existing music program by doesn't have to dilute the privacy.

## RLAP PROJECT

Concept : Platform Interlocking

This concept is to play with the overlapping bounding frames, feel amaze walking in a minimal-maze spaces, maze the house up by overlapping boxes. A key is pulling out one's amaze with any mazed element in every touchpoint.

My Task

Making physical model of this project with the other internship friends.

## VELA HOTEL

Concept : Thai Northern Traditional House

My Task : Editing (coloring) the plan with Photoshop and making presentation slide with InDesign.

## LE MERIDIEN

Concept : Living by the river

My Task : Making the unit plan, arranging room layout and calculate spaces of each program

## RKIT PROJECT

Concept : Sponge, Creating space by scoop out the box

My Task : Editing the plan and section to be posted on Design Something website.

## MATERIAL BOARD

## MILTON CLUBHOUSE

Milton Clubhouse = Gathering Place

Concept : Museum with American Luxury Design

My Task : Designing one schematic design of arranging program into the site

RTTK PROJECT

Architectural Drawings

Concept - Minimal Farm House  
 My Task : Researching references, Doing presentation board, Making 3d modeling, Making perspective and Drawing all of the architectural and construction drawing.
