## LANGUAGE SKILL

## SOFTWARE SKILL

## PROFILE

Graduated with Master degree in Architecture, specialize in Building Technology, from Faculty of Architecture and Planning, Thammasat University. I am interested in the field of building technology and innovation because I can put my creativity and apply my analytical skill to create something new. I realize that I can use design creativity through innovation technology to make the world a better place. To achieve this, I still improve myself by practicing in technical skills and looking for new opportunity in order to gain challenge experience.
