About me

I am a 22-year-old fresh graduate from Taylor's University. Currently, I am looking to secure a job relating to the architectural field. I believe myself to be a highly ambitious designer with the hopes of making an impact on urban issues. Therefore, I believe that implementing research, exploring, and creative design into architecture will affect good in the world. I may not have a wide variety of experiences, but I believe that if one is hard-working and have the grit to keep learning anyone can achieve great things. To this end, I will
continue to immerse myself with the proper skillset and learn as much as possible to fully bring out the best of my ability.

Education

2007-2012
SJK(C) Chung Kwok
4A's

2013-2017
SMK Bandar Puchong Jaya (B)
