

ARCHITECTS 49 LIMITED  
81 Sukhumvit 26  
10110 Bangkok  
Thailand

26 April 2020

Dear Sir or Madam,

With this letter I am writing to express my strong interest in working for A 49 as Architect.

I have completed a multi-disciplinary range of academic studies; Master`s and Bachelor`s degree programs (with RIBA accreditation) in Architecture at the Cracow University of Technology, including a scholarship at Amsterdam University of Applied Sciences, and a Bachelor`s degree in Landscape Architecture at Cracow University of Technology.

After the end of term at Amsterdam University I stayed in the Netherlands and acquired professional experience working for Orange Architects in Rotterdam. I successfully worked in a two-person team on projects prepared for competitions and later schematic design stages, where my main tasks were developing design, drawing floor plans and diagrams.

At the end of my Master`s degree, I moved to London to join Simon Bowden Architecture, where my work was focused on the early stages of numerous large-scale projects. These have included residential developments in London, mixed-use schemes in the UK and Canada and a private villa in Mexico. My main duties included creating and developing concepts, layouts and technical drawings, preparing visualisations and animations for the projects.

In my most current position as an Architect at Superimpose Architecture in Beijing I have found a high level of responsibility on numerous projects in China. My experience spans from initial concept design to preparing design development drawing packages. I have worked on a variety of projects, from interior design, being responsible for general and façade design, developing technical drawing packages for a project that is currently under construction, to a master plan, where my task was to design one of the main plots and help developing the others. Working in such a demanding environment has helped me significantly to develop critical thinking towards design, being independent as well as responsible for my team and always thinking about socio-ecological impact of every decision.

Having built up my professional portfolio, enhanced my expertise and acquired cross-cultural experience and skills, my objective now would be to settle down in Bangkok, as my final destination, and have a long-term focus in my life.

The abilities I have acquired so far allow me to believe that I will perform well, both on the professional and on the personal level, in the projects carried out by you. To further acquaint you with the specifics of my background see enclosed my résumé and portfolio.

I hope you can recognise my motivation and perception of architecture and that you see the potential that I will enthusiastically contribute to your office.

Thank you for taking the time to read this letter.

I look forward to hearing from you.

Sincerely,  
Michał Marcinkowski

experience

May 2019 - Feb 2020  
Beijing, China

**Architect**  
**Superimpose Architecture**

concept development, façade and interior design, CD, SD, DD drawing packages, presentations, 3D modeling, visualisations;
