27,000-25,000 Bth

- PROFILE -

I have been interested in architecture & interior design since I was studying in high school. So, I decided to attend class in architectural faculty at Chulalongkorn University in Thailand. My major is an interior architecture that had been taught me from architecture to interior design. Thus, I have had experient in both outward as well as inward design building. As a result, I keen on designing architecture not only their appearance or shape but also their inner space and function with unity and consistency.
