I consider myself a young architect **with a lot more to learn.** the **complexity** and **challenges** I am about to face in this career path is catch my interest and **motivate me** to think out of the box. In order to provide a creative problem-solving and bring resilience ecosystem to our community. I do believe in **resilience and sustainable** design over a stunning building form. However, the aesthetic outcome that **balances form, function, and wellbeing environment** is my key approach to **defining space.** I do **passionate about detail design,** it is a tiny-scale of work but affects a huge change.

EDUCATION
