ABOUT ME

I am an Architecture graduate and my passion is not only about architecture but in everything about design. I can work hard for it and I always enjoy doing the work I love.

I was born in Pattani, Thailand. I studied primary school and high school in Pattani and after I finished high school I moved to study in Bangkok. Even though I studied in Mathematics-Science program. But art has been my passion since childhood. I like drawing and making crafts. So I decided to study architecture, which is a combination of art and science.

So this portfolio shows off my abilities skill and potential. I try to improve myself all the time
