Hello!

I am a 21-year-old Architecture student at Bhopal's School of Planning and Architecture, where I am in my fourth year of a five-year programme.

I've always been fascinated by how structures and physical forms affect people's lives, and I'm hoping to learn more about how structures and physical forms influence people's lives during my internship, and I'd be grateful if your team could be my guiding hand into the professional realm of architecture.

I look forward to hearing from you and thank you for your consideration
