FRESHER ARCHITECT

" MINIMALISM IS BEYOND TIME , IT IS THE STILLNESS OF PERFECTION. "

- MASSIMO VIGNELLI

An enthusiastic and aspiring fresher architect , ready to take on a journey in the professional field of architecture. Compelled towards diligence, I have a meticulous approach towards all kinds of work.

The major areas of interest in design are Minimalism, Green building design, energy - efficiency and adaptation of vernacular techniques of design with modern architecture in interior and exterior building development.

Some key qualities that define me as an individual are confidence, competency for teamwork and acceptance towards new challenges. Fluency in written as well as verbal communication is my forte. I am observant, organized and strive towards the achievement of standard deliverables under given deadlines.

My aim is to find a platform where I can learn, discover and deliver.
