ABOUT ME

Why do you want to be an architect?
 When I was a child, I often saw my father drawing interior perspective almost every day. Personally, I like to watch cartoons and like to bring cartoon designs to my father to draw. So I brought the cartoon style to my brother to draw instead. until he had no time to draw for him So tell me to draw it myself That day was the day that changed my life. Because I always draw by myself. From drawing, it leads to entering the Faculty of Architecture. My favorite subject is design. because I am very excited that Projects in which teachers have given the same problems to students How will I do it myself? Because my work has never had the final image. But I will focus on working in small parts accordingly. Because I believe that good work must have a strong work concept. and clear design goals My answer to why I want to be an architect is I am happy with the design that will improve the quality of the architectural space. Because I want to see new possibilities in space. They learn from obstacles, problems and mistakes in each task. leading to a solution to refine yourself to work more efficiently
