Hello, My name is Suchada please call me Jum. I'm currently working as architect at Tandem Architects 2001 co. Ltd. with 5 years of working experience and also specially interested in a work of hospitals, hotels, resorts, high-rise buildings and condominiums.

I have an exceptional practical skill because I respond to the customer's need and want. I choose to work through the understanding of people, focus on user-centered design to create experiences in the work piece, and also focus on the user behavior as the top priority. Apart from this, I often travel to various places to collect pictures of people's daily lives or just to remember and absorb that atmosphere of the places.

Inspired architects: I like Wang Shu; whose main concept is to bring architecture linked to people's daily lives.

Future goal: I foresee the growth opportunities in China market. At present, I have developed my Chinese language skills and would love to gain more experience in architecture and expect to have the opportunity to benefit your organization at my best effort.
