

Nataphong Penton

Architect

Profile

I am an architecture student starting my career as a designer and aspiring to learn key skills in the construction industry: design, construction management and project development work. to have enough skills for my own business

I have experience in my first skill working in a design company for 3 years in architectural design. Write construction drawings and coordinate with other departments.

and I'm interested in the second skill, Construction management that your company recruits despite having no direct experience in this field But I am interested and ready to learn this skill if given a job opportunity.
