I am a strong and skillful Electrical QS and site engineer with 10 years experience of provide cost and material estimates, draw up projected budgets, and work alongside a team, noting any design changes and their effect on cost.

I often liaise with builders, architects, engineers, and other contractors. Reviewing plans and preparing quantity estimates, negotiating with various contractors and vendors, as well as building relationships with clients and site managers.

I want to apply the knowledge that I have learned to create value and benefits for the organization.

## EXPERIENCES
