ABOUT ME

In my capacity as a student studying interior design, I see myself as a diligent worker who constantly seeking for a solution and development in design. I previously engaged in a professional internship experience.

I'm ready to take on new challenges as a designer and the many difficulties that lie ahead of me. In my life I believe in hard work, because everything that you do and fight for will lead you to success if you keep on trying. I always make an effort to listen to others and pick up new knowledge from them. I'm now in my second semester of my fourth year, however it will finish at the end of March.
