

Toni Angela Peji Rosanes

Interior Architect

About me

I am an Interior Architecture graduate who enjoys duality - the feminism of Baroque and the masculinity of Modernism, and the contrast between the old and the new. My work idealises maximalist concepts before narrowing down my explorations to workable solutions in spatial design. I'm also a passionate learner and I love to explore culture-infused design as a reflection of all of my travels. As a lover for words and poetry, I listen to the buildings talk - the past, present and what they want to become. The natural environment to me presents learnings of the past that inspire conceptual solutions and ideations in the built environment. Lighting design has also been a big part of my work in regards to how it can be used for healing, wellness and, aesthetic to encourage user interactions.
