

RESUME

PATHOMPAT MEKBENCHAPIVAT

ABOUT ME

I am a contemporary Thai architecture student from Chulalongkorn University. The reason why I chose this career path because Thai architecture is not only the important country's cultural legacy, but it is also suitable for tropical climates. However, Thai architecture is being replaced by Modern architecture nowadays and I've got a feeling that this worthy art will disappear from Thailand someday. In my opinion, I, as a Thai citizen, determine to be a person who conserve and develop Thai architecture in order to suit this and the future generation's lifestyles.
