Architect and Graphic design Freelance

LANGUAGE SKILL

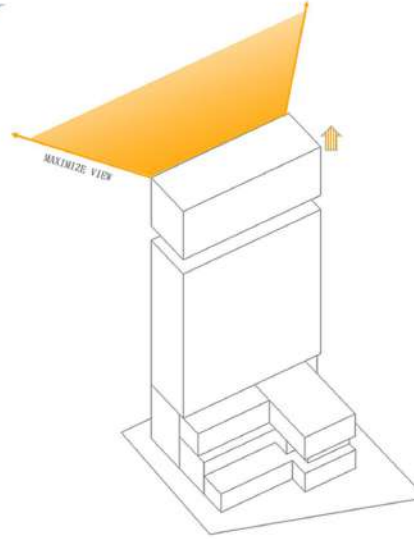

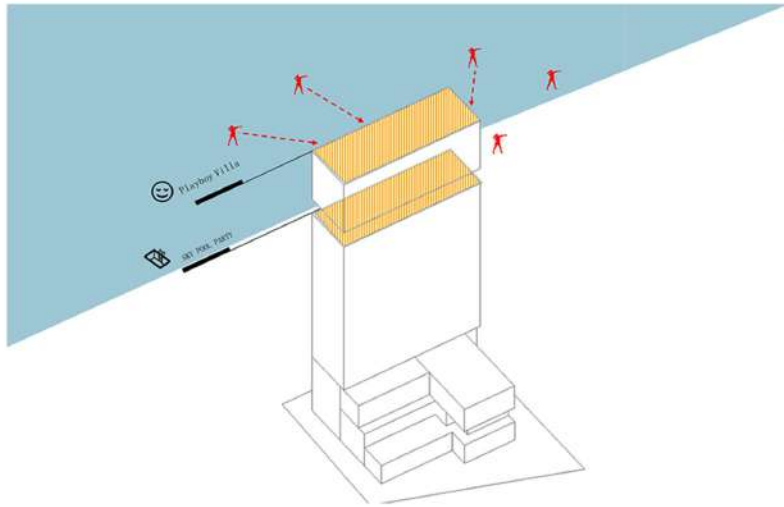

HONOUR PATTAYA

The aim of project is how design corroborate between outdoor and activities of the city.Both can work together to create space impactful in relation to the design.

There are two of building which is separate by two function. The first is hotel. There are incorporate element of night life with interior space.The next building is residential which is once hidden space has ability to welcome into the city and using nature in a function and aesthetic way.

PENT HOUSE

SKY POOL

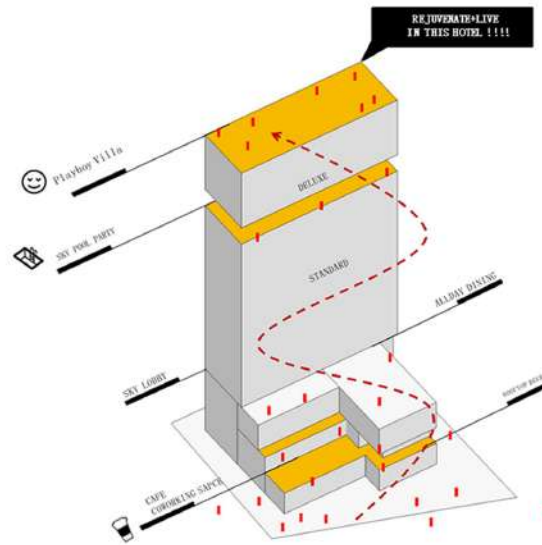

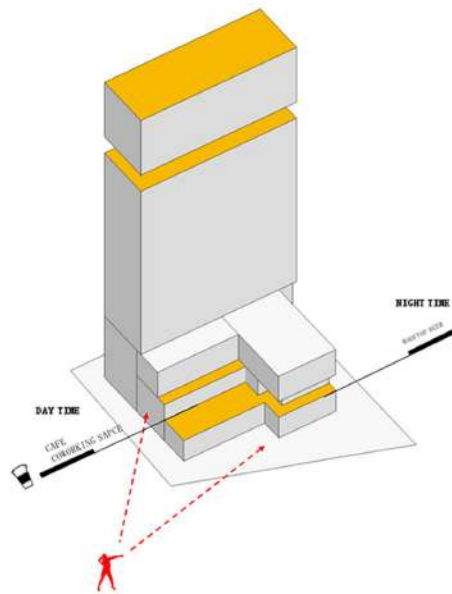

SEA LOBBY

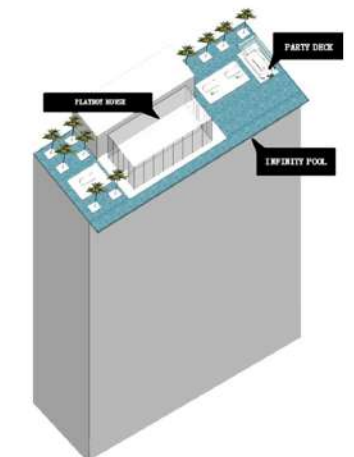

ACTIVITY AREA

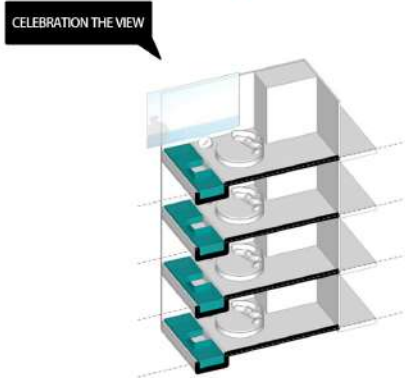

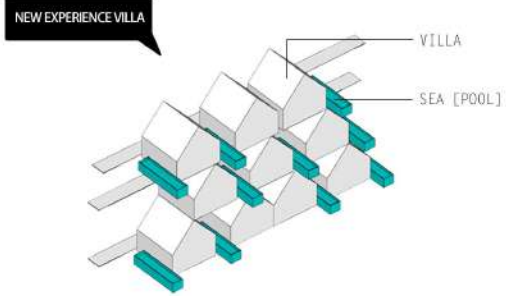

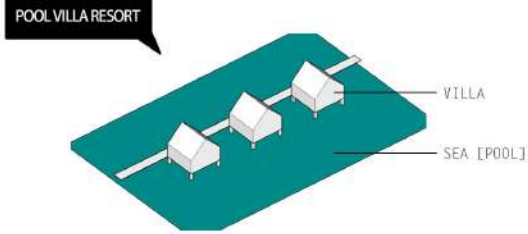

ACTIVITY AREA

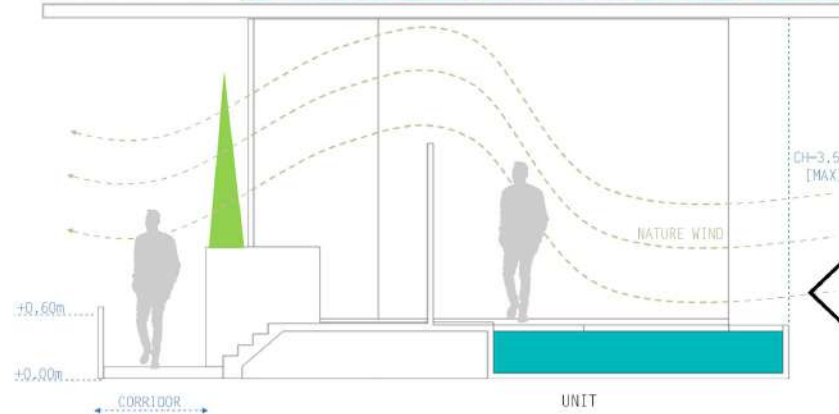

HOTEL CONCEPT DESIGN SPACE

RESIDENTIAL CONCEPT DESIGN SPACE

Bringing greenery from park to doorstep. connection of homes
 To connect greenery from park on ground up the entire building through terraces and green walls, among other features.

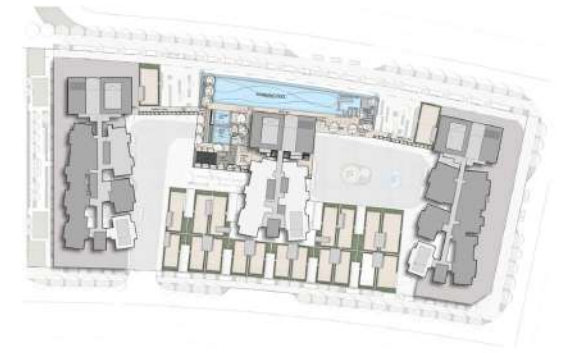

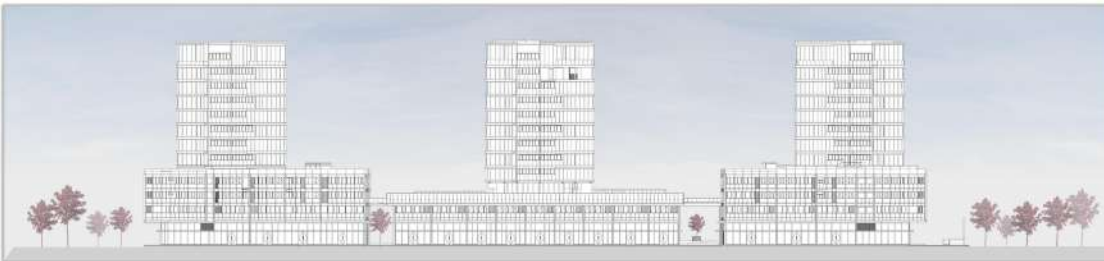

UNIT DESIGN CONCEPT : NATURAL VENTILATION
 Pool villa unit studied to use wind as infromative part of design process in order to activate which are interior and exterior environments by open the window to close with beach.

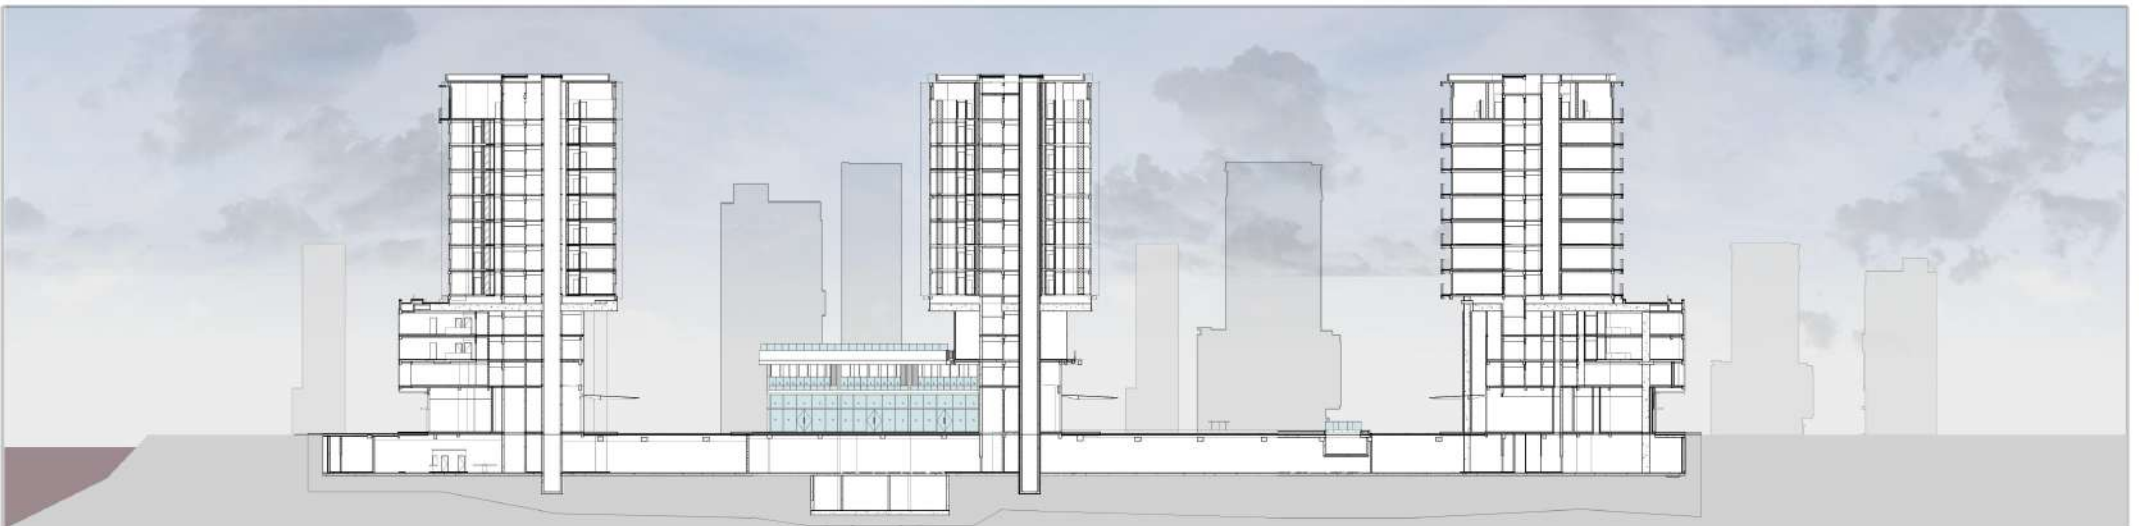

THE GALLERIA METROPOLE

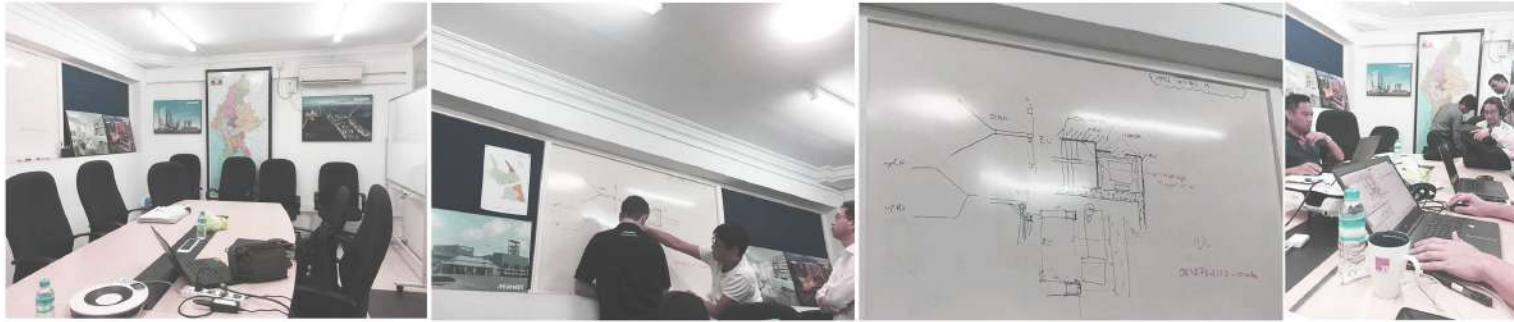

The project is in Vietnam. There are in new province.
The site is in front of a new Vietnam 's opera house. There are three functions in the highrises. First is retail and communities to serve people surround there. The second is rental offices. There are three stories. The last is residential for sale in many types such as 2 and 4 bedroom, penthouse and sky villa.

The concept of this project from a rhythm of music.
The idea from surrounding which is the opera house in the front. Massing is one of the three options chosen by clients.

The project is in Vietnam. There are in new province.
The site is in front of a new Vietnam 's opera house.
There are three functions in the highrises. First is retail and communities to serve people surround there.

The last is residential

We joined coordination meeting with client and consultants including engineering, MEP engineering, and structure engineering at Yangon , Myanmar. The meeting which was found the problem of the project, For example, some area had beam crash with pipe of MEP than effects with drawing, So we coordinated to find the best way to decrease the construction on site.

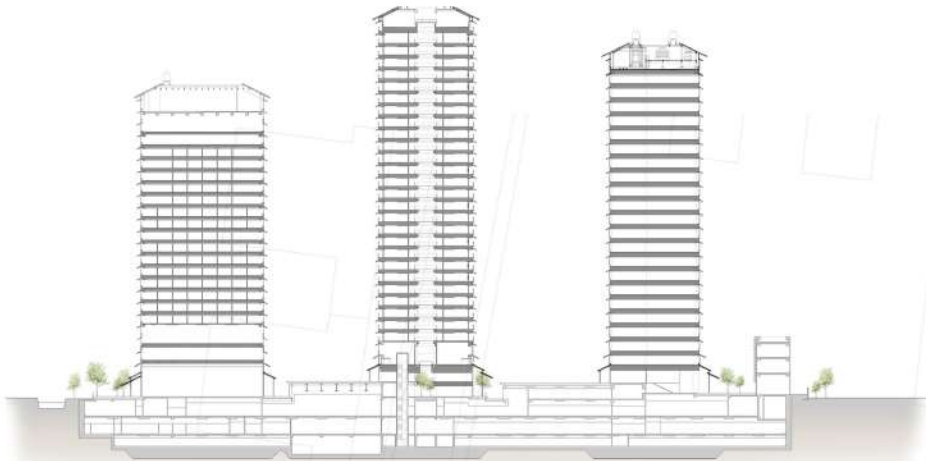

This project is ASEAN sector there are Japanese developer. The key concept of the mixed development is "The Garden for the people". As the title had suggested the development aspire to let all type of user to move through the site seamlessly without barrier. Straying away from the conventional approach of having retails and facilities situated at the podium, all the retail had been sunk into the basement 1. This further enhance the idea of seamless connectivity with the public.

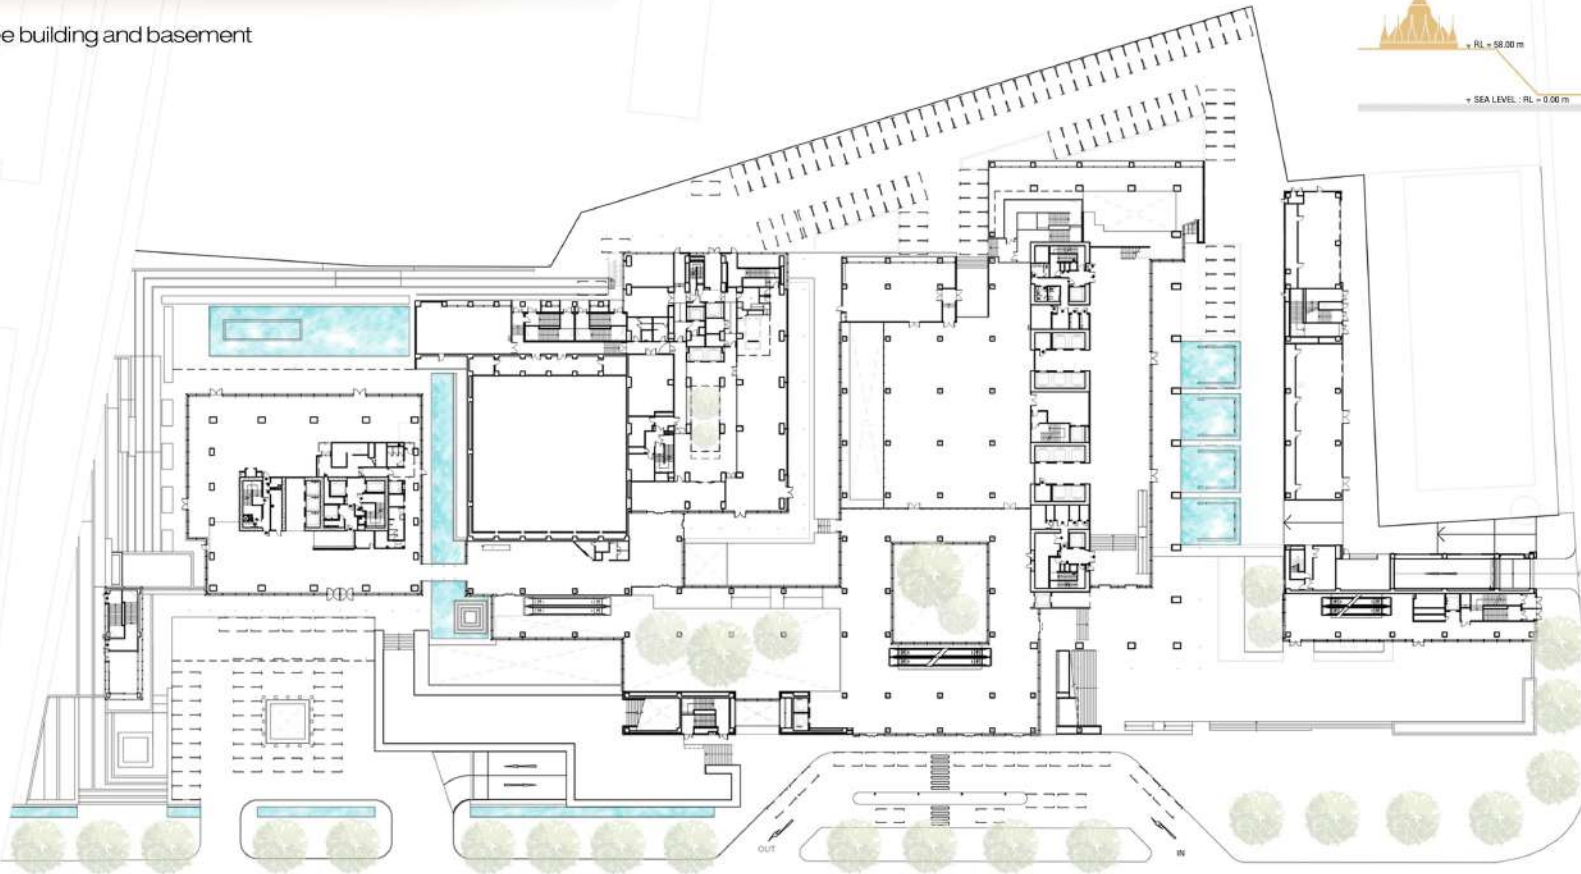

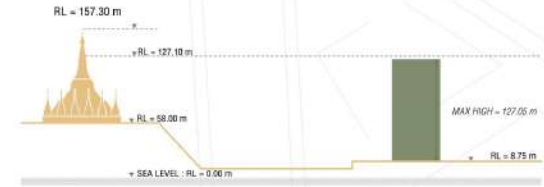

THE GARDEN PROJECT

Location Yankin district, Yangon, Myanmar
 Client Kajima Corporation

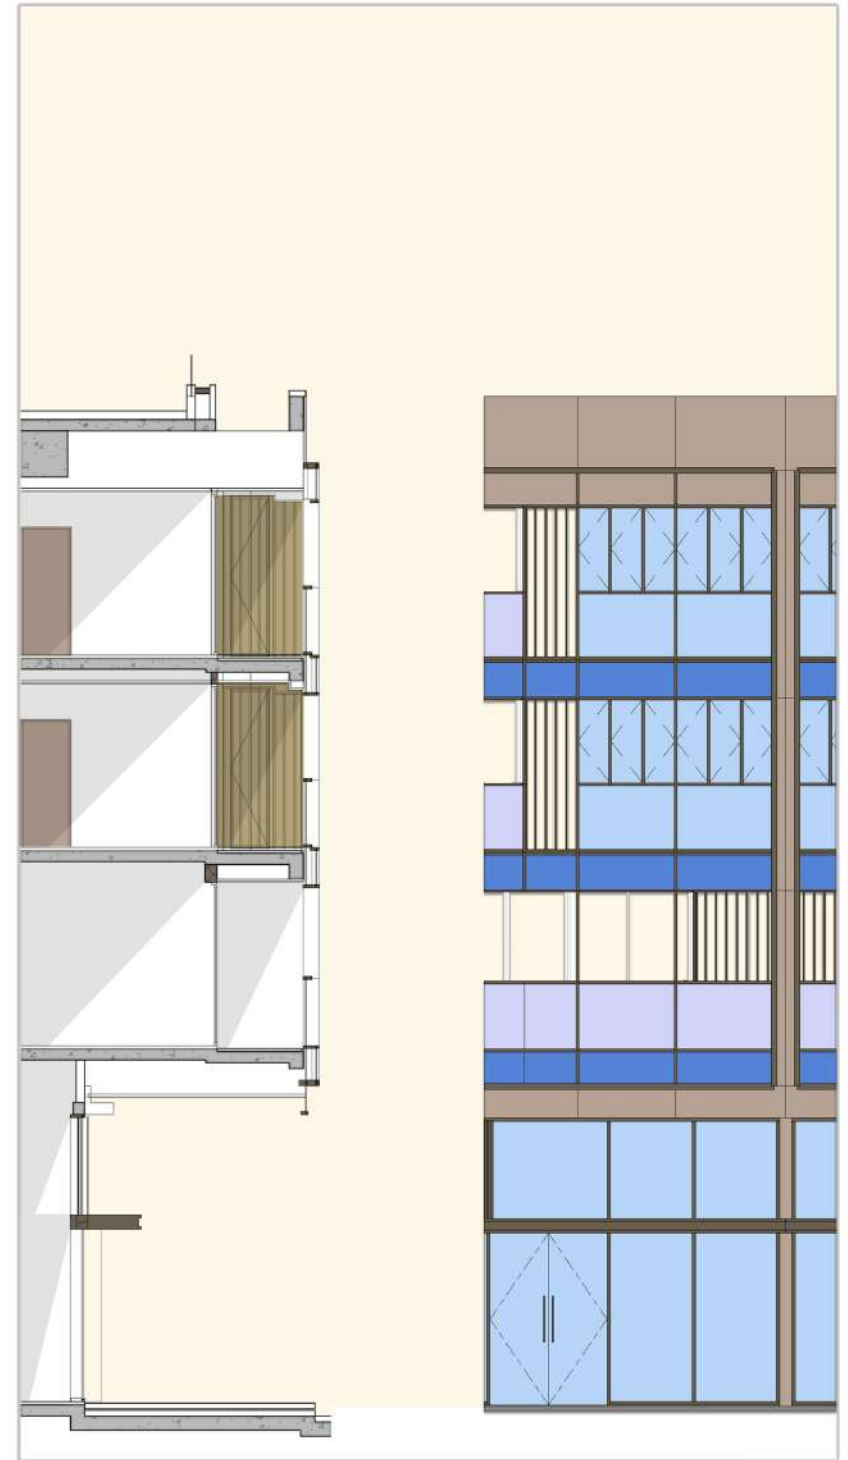

Program Mix used [Hotel,Office,Longstay]
 Total construction area 176,542.38 sqm
 Far Accountable Area 133,896.12 sqm
 Floor Area Ratio 4.93
 Project year 2019

Long Section to show three building and basement

Floor plan layout : Ground floor level

Facade for construction Drawing :
The facade and update drawing to
construction on site. We draw the
detail by Revit.

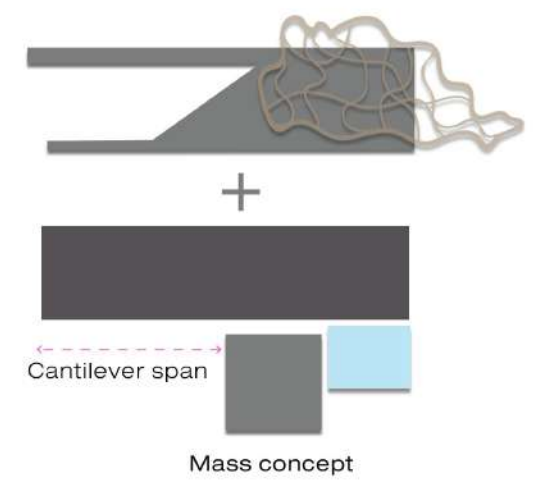

C-11 VILLA SERIES

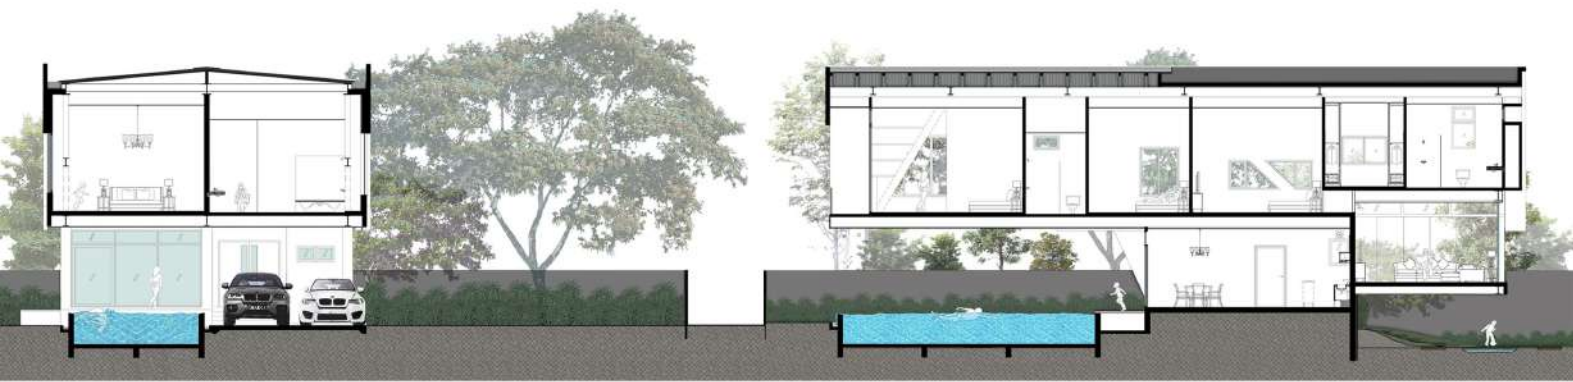

Location	Chiang Mai, Thailand
Client	Engineer and developer
Program	Housing development
Area site	10,138.69 sqm
Housing number	6 residentials

There are needed to design an unusual housing estate. There are structure extraordinary designs. I supported all design with exterior and interior. They are designed to cantilever's structure long spend to show the function area.

Facade cover to behide the house

^ The idea of house is show how support of design and balance structure. It become morden form.This is the facade cover half of the house.There is create private space of bearroom and reflect sunshade from outside to decorate living room on ground floor.

< The first is shot section to show front of house. The second is long section to show all the room and cantilever support from structure.

C-11 VILLA SERIES X101 I

The idea of designed interior chosen natural materials and color tone , Who lives in the house can gets feel relax and comfort in the room.In living room like to close up with nature. There are contrast with exterior.

Metrial

Floor : Granit stone

Wall : Wood

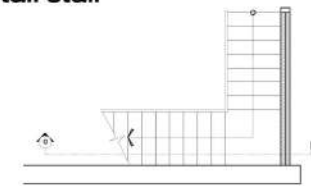

Flame window : Wood

Furniture : wood log , sofa , shelves
