## Introduction

Indian habitat centre is for the unification of all individuals and institutions working in diverse habitat related areas. Other than that the centre also serves as a place for social and cultural activities and organizing exhibitions.

## Concept

Area analysis help in zoning layout of the function which help in deriving concept plan before reaching the final stage concept has to be approved.

## Aim

The aim of the proposed project is to study the building design that would faciliatate thepublic built design and to study a design which accommodate both the rural people and foreign people ..
