" Alternative healing by specific type of energy."

Frequency energy

Everything that exists in our universe are consists of pure energy which resonates as a frequency vibration. Scientist are studying frequency energy to achieve the development of medical treatment. They used difference type of frequency form: Sound, Light, Heat, and viration.

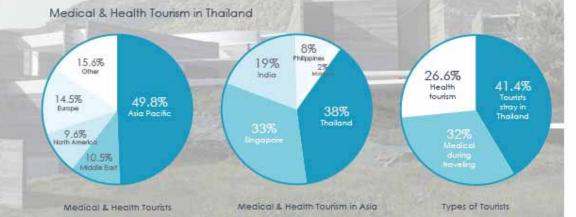

Thesis question?

How the architecture effect on healing factor in human physical and mental?

- Architecture encourage frequency vibration
- space that most effective to healing factor

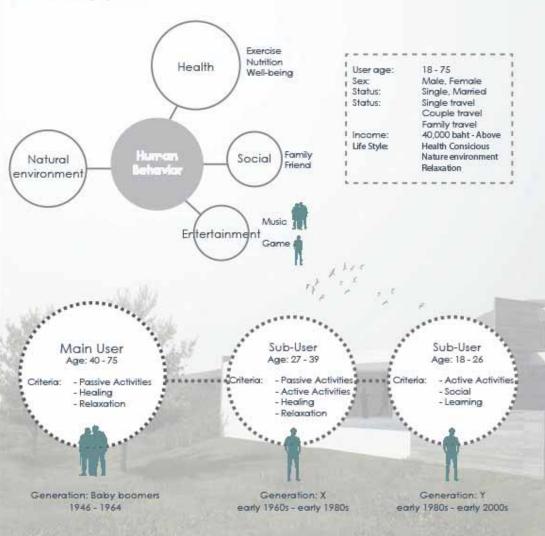

What is Health Tourism?

Aging Society

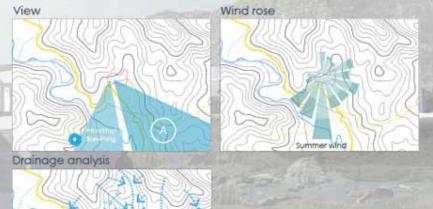

Thailand population 64.5 million people. 9.4 million people are 60 years and above which is about 14% of total population. Number of elderly increase by 500,000 people. Prediction said that in 2025, elderly population rise to 14.4 million people or 20% of total population.

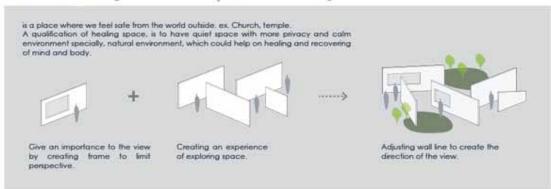

According to the information from Ministry of Tourism and Sports, the number of tourists that travel in-out at Chiang Mai International Airport had 212,722 people in December which is less than other international airports but by the record of Aging Society in Thailand, Chiang Mai has the most ratio elderly through 90.5%

Site information

Concept - Secret Sanctuary

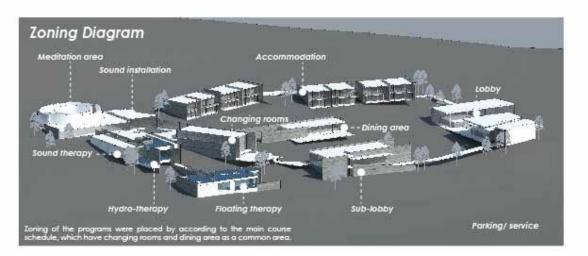

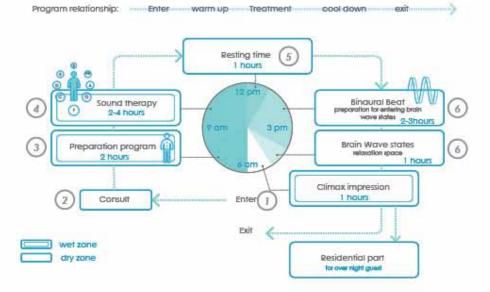

Shape and Form

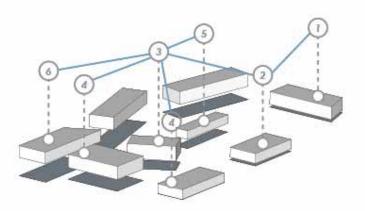

The programs were placed by its Turning the mass to create sequence. Green space is locating in relation of the programs, then the middle to serve all the programs elevate to sit on the contour. as a courtyard.

Linear stone walls were direct to the direction of the specific view for each programs and work as structure.

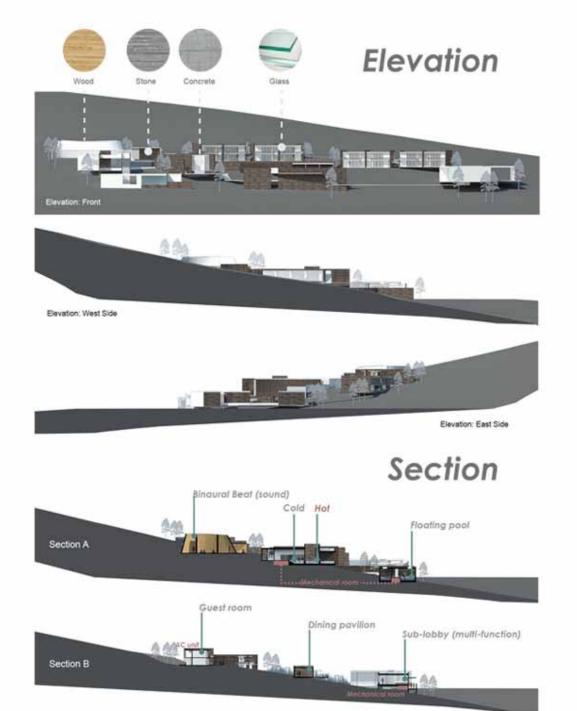

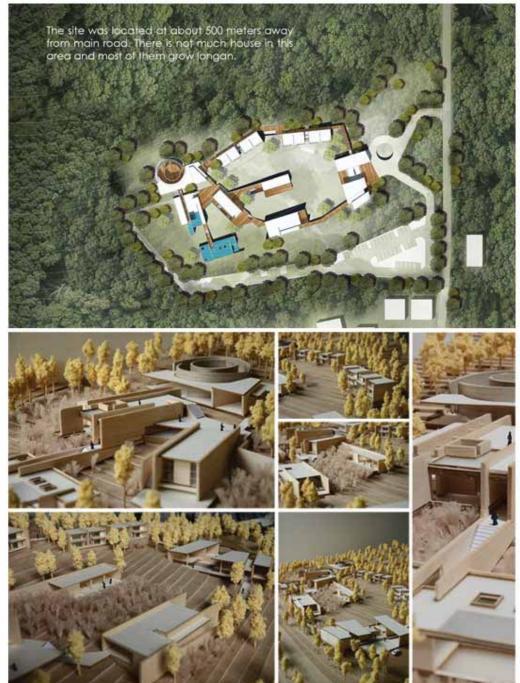

Program connection

Changing rooms (3) has a function as a gate to enter therapies zone. Guest must change to proper uniform for each treatment. When they done from the treatment, they will get change before leaving therapies zone.

Workshops & Activities

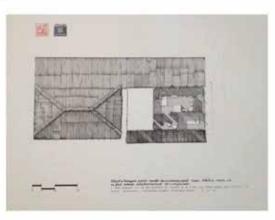

Urban design and architecture workshop at Shibaura Institute of Technology. The project was decided as a group project which KMUTI students coordinate with SIT students. My group project was about the designing an information center for community which have elderly as our main user.

2012 / School for community

2013 / Sardinia Landscape workshop

2013 / Architectural study trip: Berlin, Rome

2015 / Vernadoc workshop at Talad Phlu

P&T PROJECT

SCOPE OF WORK : GRAPHIC DESIGNER

- Preliminary project/ site study
- Facade Development
- 3D making
- Rendering
- Autocad drawing

OFFICE

MORCHIT COMPLEX

Bangkok, Thailand

Location: Phaholyothin Road

Client : BTS Group Type : Office , Retail G.F.A. : 169,350 sq.m.
