PEISING

SATINEE SAETAE
ARCHITECT AND INTERIOR DESIGNER

I have always been interested in architecture and interior design. Because an architecture is the art of designing buildings and Solve the problem between context and human and Interior design is the art of enhancing the building to achieve a healthier and more aesthetically pleasing environment for the people using the space.

I'm looking for a job with a great position to learn and improve. I would like to utilize my skills and experience which are building designing, marketing research, creative ideas, conceptualize and interior/exterior design. In addition, I have a strong team work communication as well as a fast learning skill. So, it ensures that I will perform with the great works in order to achieve the goal of the company.

CANOPY GAPS

Gaps are the result of natural disturbances in forests, ranging from a large branch breaking off and dropping from a tree to a tree dying then falling over, bringing its roots to the surface of the ground, to landslides bringing down large groups of trees. Because of the range of causes, gaps, therefore, have a wide range of sizes, including small and large gaps.

02 MOBILITY OBSERVATION

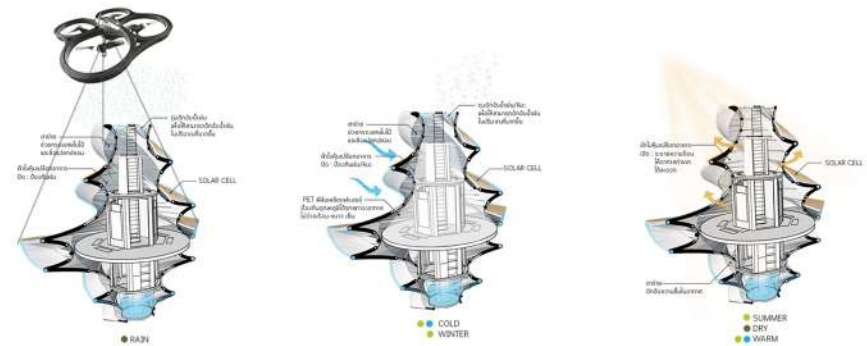

AMAZON RAIN FOREST

MATERIAL & STRUCTURE

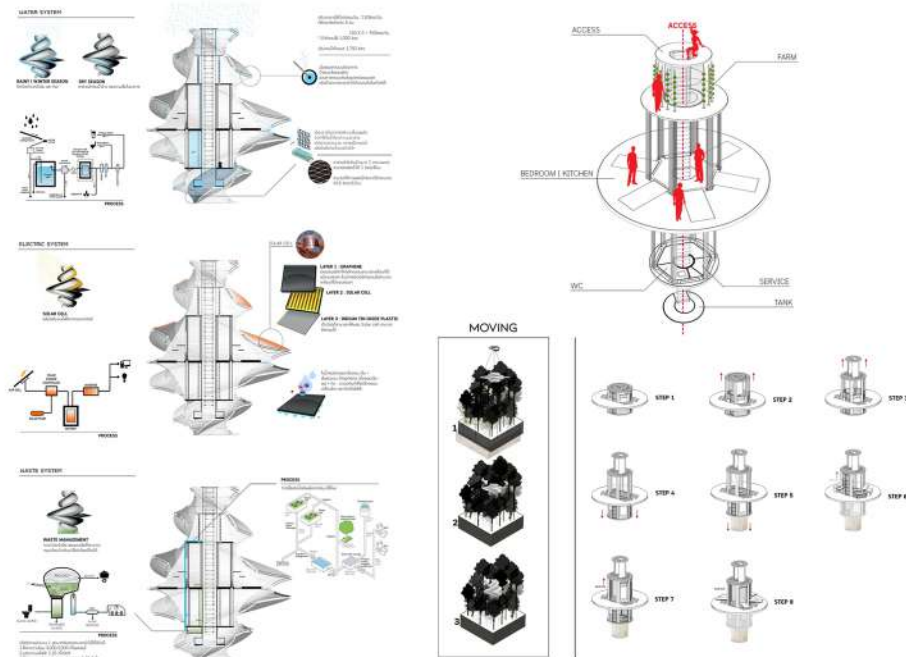

MOVEABLE

Mobility wild Observation Pod can be transported easily to any location by transport drone the pods had Light weight and compact enough to be deployed anywhere and can supported in different seasons.

SUSTAINABLE SYSTEM

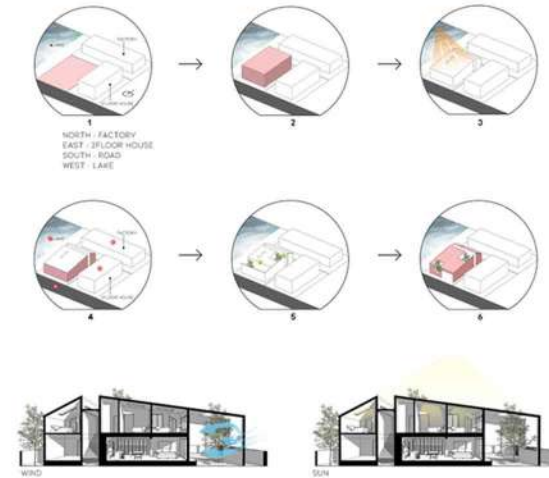

03 TROPICAL HOUSE

TROPICAL HOUSE

The design concept answered fundamental home needs including functionality of use, features gradually added to support the owner's natural habits, and comfortable living such as "cross ventilation" which allows air to move freely through the building. The void and small fish pond in the side of the living room, front of frames reaching tree branches, which seek the natural sunlight. Inside the living room, the decor is wood tone and white concrete.
