Alvar Aalto Museum | Finland

Project Detail : Museum and Cultural Centre
Area : 5,000 sq.m.
Year : 2018
Scope of Work : Architecture / Interior Design / Landscape

THE ROOF & THE TERRAIN are elements that proposed to work in between 2 museum to create natural landscape ground with outdoor under roof covered.

The Roof is overhead surface light weight/self supporting/column free with weaving layer of roof material to create diversity of light floating over the area.

The Terrain is manipulation of existing site contour to create a natural landscape contour ground for public activity to support extension of activity from the 2 museum. The utility services to be located under the new terrain.

As a result, the area become open natural landscape activity space with diversity of light effect from The Roof allow people to enjoy open natural landscape freedom/multiplicity usage of space that bind 2 museum together.

THE ROOF

TOP LAYER

The topmost layer of the roof is cedar SHINGLE lining along the curve of roof surface with opening strip for natural light.

SECOND LAYER

The secondary layer of the roof is layer of timber lining orthogonal to the top layer with opening strip to allow light penetration.

SKYLIGHT

Transparent material to allow natural light yet protect the below space from rain/snow.

STRUCTURE

Laminated timber ribs like boat hull create column free/lightweight self-stabilizing roof surface. The gap between the ribs allow natural light penetration.

THE TERRAIN

SOUVENIR SHOP

Extension of museum shop as Kiosk.

THE TERRAIN

Stepping landscape by manipulation on existing contour with some additional of timber decking / cable floor underneath of the terrain is the LOWER CONNECTIVE GATEWAY.

THE BAMP

Connecting element between 2 level of 2 museum
Old floor of Central Finland Museum to 2nd floor of Alvar Aalto Museum.

THE CREEK

Utilizing existing water body into landscape feature.

"OUR BIG OPPORTUNITY MAY BE RIGHT WHERE WE ARE NOW"
