Consulting & Management 49 Company Limited

Dear Recruitment Team,

I am writing to express my keen interest in Civil Engineer position available in your company. I recently learned about your organization through the career webpage via LinkedIn and was impressed with the innovative work your company does. After visiting your website, I have gained a better understanding of the cutting-edge technology being utilized. This position would help set me on the right path to achieve my career goals.

During my previous role as a **Site Engineer** at **APS Asia Instrument (Myanmar) Company Limited**, I learnt to work in interdisciplinary teams that included both technical and non-technical disciplines. As a result, I developed strong communication skills and was able to ensure that all stakeholders' needs were effectively communicated to the team and met to the clients' highest level of satisfaction. As a Site Engineer for the Bago River and Dala Bridge project, funded by Japanese and Korean Government for the development processes in Myanmar bridges and transportation, I was responsible for inspecting the pile cement coring work, cross hole sonic logging test, pile dynamic test, pile load test and pile integrity test. Throughout the project the senior engineers were incredibly supportive, providing guidance and explanations during my working time on site.

My previous internship experience at **High Tech Concrete Technology Company Limited** allowed me to gain valuable experience in quality assurance and quality control works. Throughout the internship period, I was able to learn a vast amount of knowledge in the areas of Structural works, Architectural works, Mechanical and electrical works, safety works and so on. As an engineer trainee, I took on the responsibility of inspection work alongside senior engineers and I was able to contribute to the successful completion of the **Crystal Tower and Residence Projects**. Through my internship experience, I developed strong attention to detail and gained hands-on-experience in quality control processes. I am confident that the skills and experience I gained during my internship and my studies will make me a valuable asset to your team.

As a graduate with a master's degree in **Construction, Engineering and Infrastructure Management (CEIM)**, I have gained extensive knowledge in the areas of integrated Project Planning and Control, as well as Organizational Management. I am confident in my ability to not only monitor but also update stage of constructions effectively. Furthermore, my education in Project Cost and Financial Management has provided me with the necessary skills to support the establishment of project resources and manage and as well as monitor project budgets and project costings. With these skills, I can effectively track project expenses, identify potential cost overruns and adjust the budget as necessary to keep the project on track. Additionally, I can leverage my financial expertise to analyze the financial impact of various project decisions and provide guidance to the project team.

Thank you for your time and consideration and I am looking forward to learning more about the Engineering positions. In this new role, I am willing to work diligently to meet the needs of the company and to become a productive part of the team as quickly as possible.

Yours Sincerely,
Myat Htet Kyaw
