DESIGN AND BUILT PROJECT |

Guardian Industries Office

Location : 21st Floor Emporium Tower, Bangkok, Thailand

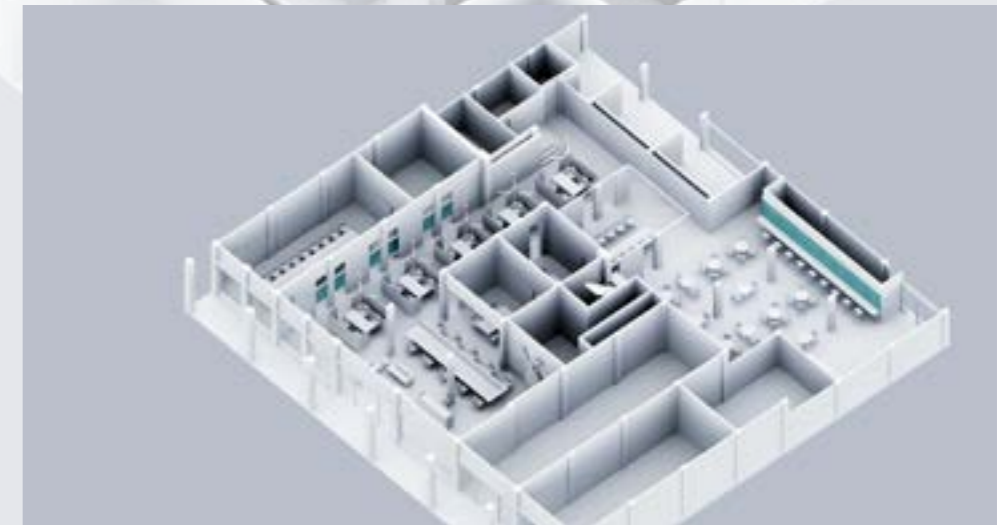

Area : 750 sqm

Co-design : Project

Year : 2019

“Guardian Industries Corp Ltd., a leading worldwide manufacturer of float glass and fabricated glass products for the commercial & residential construction industries, as well as for the automotive industry.”

Initially, the concept of the project derives from the abstract of glass. We had an understanding, as specified by the client, that glass helps us connect perceptually between the exterior space and interior spaces. We define glass as an exterior intervention, bringing knowledge and new insight for external factors which helps shape the inner self. With this abstract, we designed the office as if it's a tool for collaboration. Besides having a main gathering area, each division has its own meeting room and co-working space for teams to collaborate. Since the client is a glass manufacturer, the reception area is designed to showcase various glass products.

Dutchmill Office
