CHIANG MAI COEXIST HOUSING IN URBAN RESILIENCE FOR MULTI-GENERATION THESIS

PROJECT
Residence

LOCATION
Chiang mai, Thailand

AREA
12,022.79 sqm.

YEAR
2020

ABSTRACT

Social structure changing greatly affects the situation of living. In addition to the current situation, whether it is COVID-19 or PM_{2.5}, which affects the lifestyle of "home", which is a residence, it needs to be adjusted in accordance with the environment. The impact can be achieved flexibly both work from home or online learning.

It brings up the question of the research : adaptive urban housing programs for different groups of people. Chiang Mai province should it be by studying information under Urban Resilience theory, Social Dynamics theory and the theory of In-Between Space. The project aimed (1) to design areas of relationships among people of different age groups in the current society, (2) to design areas that build relationships in the social, economic and environment consistent with changing urban situations and (3) to improve the quality of life promote urban adaptive housing potential Chiang Mai in the future.

BAAN KLANG NA BOUTIQUE HOTEL

STUDIO III

PROJECT Hotel	LOCATION Chiang mai, Thailand
AREA 6000 sqm.	YEAR 2018

The hotel is based on the unique characteristics of Lanna Chiang Mai, Keng Tung and the context of the project location, including the Ping river, rice field and communities, by using the distinctive points of each culture to develop a contemporary architecture to meet the needs of the tourism industry in Chiang Mai that is popular in the field of culture tourism and natural tourism.

CONCEPT DESIGN

Keng Tung	The uniqueness, complexity and repeatability of the gable roof including the way of life that is similar to Lanna Chiang Mai.
Chiang Mai	Galae House with the unique degrees of roof and connecting the area by using the terrace and floor plan use the lower level instead of the room partition.
Nature	The way of life of the Lanna and Keng Tung people all comes from rice and being nourished by the water that flows

CHIANG MAI HEALTH COMMUNITY

STUDIO III

Architectural design for a modern, unique community. So, there are primary user groups that have specific lifestyles which leads to appropriate for that project truthfully.

CONCEPT DESIGN

In designing this project, Chiang Mai Health Community is based on the coexistence between human and nature that are interdependent. Therefore bring this relationship between human and nature to interlock to

In addition, Facade design is derived from the rhythm of the movement of the fabric in the Yoga Fly, which has a beautiful spiral pattern and the layer of uneven thickness of the fabric, So bring these idea and principles in design of architecture both in the facade to decorate the building and prevent sunlight shining through each afternoon and also make the building look more unique.

SITE SELECTION

Su Thep, Mueang Chiang Mai District, Chiang mai

The location near the big intersection can be easily observed and attract users. The Project has a design different from other shopping centers in the form of Community Mall, resulting in a lot of open space. So there are the way to go home, work, school and near landmark such as the airport, Nimmanhaemin rd.

DESIGN DEVELOPMENT

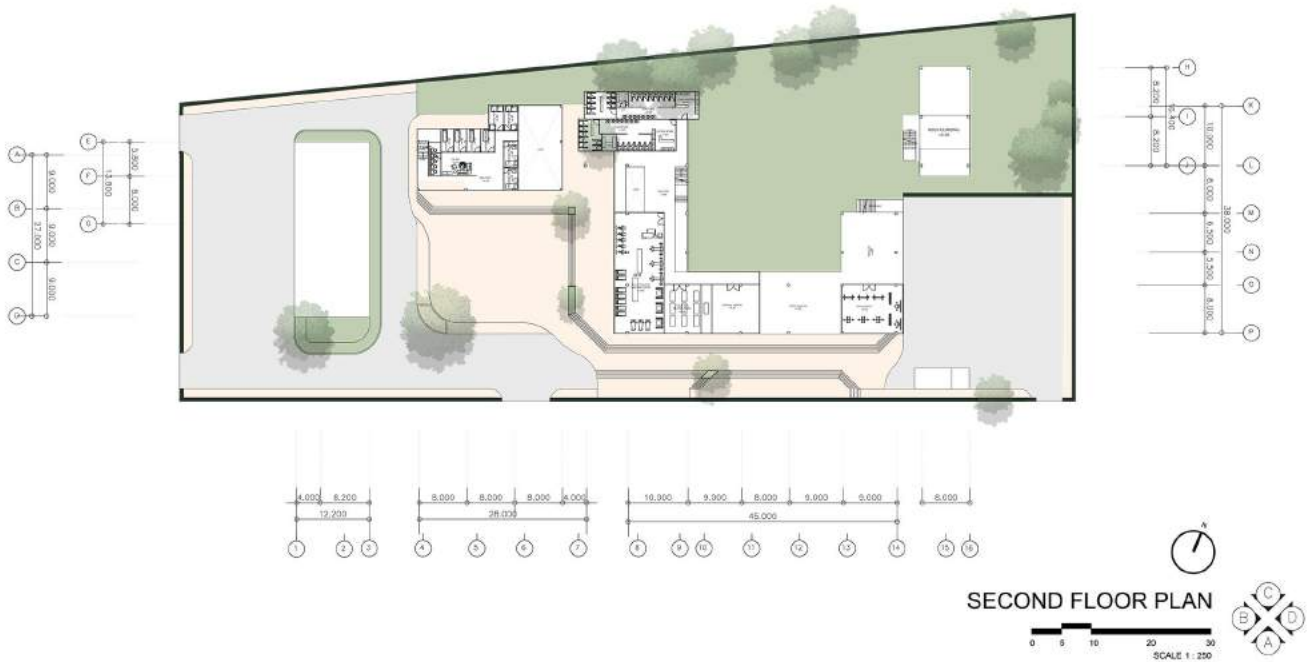

INTERLOCKING SPACE

FACADE DESIGN

Movement of Fabric

USER

Working age group 25-34 years who have lifestyles interested in health care plan for future health and student groups that are interested in health whether it is a single activity or a group activity.

- 1. Chiang Mai University Personnel Group
- 2. Civil Servant and State Enterprises

- 12. ETC.

The main structure is reinforced concrete with long span terrace. The interior of the building opens to the outside using glass, so the space from the building into the terrace at the garden is “Geometric Control” in which the architecture interacts with nature by exposing the light to the green space of the tree came in for the architecture reflects the Modern Movement

APPLIED LANDSCAPE ARCHITECTURE COMPETITION

OWNER'S REQUIREMENT

Private area with large tree to conceal sight from the 5 intersection of the electric cable in the west area. There is a pavilion in the public area for 6-8 usersm connecting to the well using the most original materials. There is an outdoor kitchen for small party activities on the west side od the fence is a storage area for wooden equipment and planting flower plants, friut trees and vegetables in the garden.

CONCEPT DESIGN

From the requirement and owner's idea, therefore, there are garden design ideas. The style of "Shade" and "Joyful" by designing the garden to relax the mood of the house. There are a pavilion to connect the relationship of the family which the pavilion has been designed to consist of 2 parts that are private pavilion used as seating and open terrace can be an outdoor kitchen layout of the pavilion used with mixed trees.

FUNCTIONAL DIAGRAM

SITE ANALYSIS

63 Soi 3 Thapae Rd.,Chang Moi,
Mae Rim District, Chiang mai

Create privacy by bringing medium sized trees to cover the eyes. Also creating an atmosphere with the mild scent of the tree that gives the fragrance such as Peep, Mok and decorated between walkway with gravel gardens to create peace. There is a multi-purpose pavilion between the house and wood shop with a view that can see the
